

DLQC-FDJ019

Diesel Engine Disassemble Bench

Basic Configuration

Reducer, flip frame, Isuzu engine assembly, disassembly flip frame instructions and training guide book etc.

Features

1. Students can perform the actual operation of the engine disassembly and repair in flip frame
2. Engine can do axial 360-degree flip and static.
3. Meet the whole process requirements of engine disassemble, refitted, debugging, inspection requirements
4. Large oil pan can prevent tools, components, oil from dropping and train good working habits.
5. Can customized other models according to customer requirements

Training Content

1. Engine disassemble and assembly training
2. Engine components installation position training
3. Assembled Engine troubleshooting and confirm training
4. Engine practical operation and theoretical exam engine training
5. Each component working principle training when the engine works at low speed

Technique Features

1. Support frame adopt imported panit special for car, high temperature coating, with anti-corrosion function
2. Support frame material is welded with quality square tube(40*60*3mm)
3. Stainless steel oil pan at the bottom
4. Flip stand size: 850×590×1100mm
